UNIX COMMANDS AND THE ENVIRONMENT

$ **set**

⋮

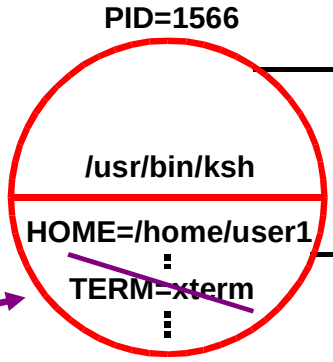
HOME=/home/user1

⋮

TERM=xterm

⋮

$ **unset TERM**



Text segment
contains program code
(shared, read only)

Data segment
contains several data areas
(linked lists for local variables and
for exported variables for instance)

$ **TERM=xterm**

$ **echo $TERM**

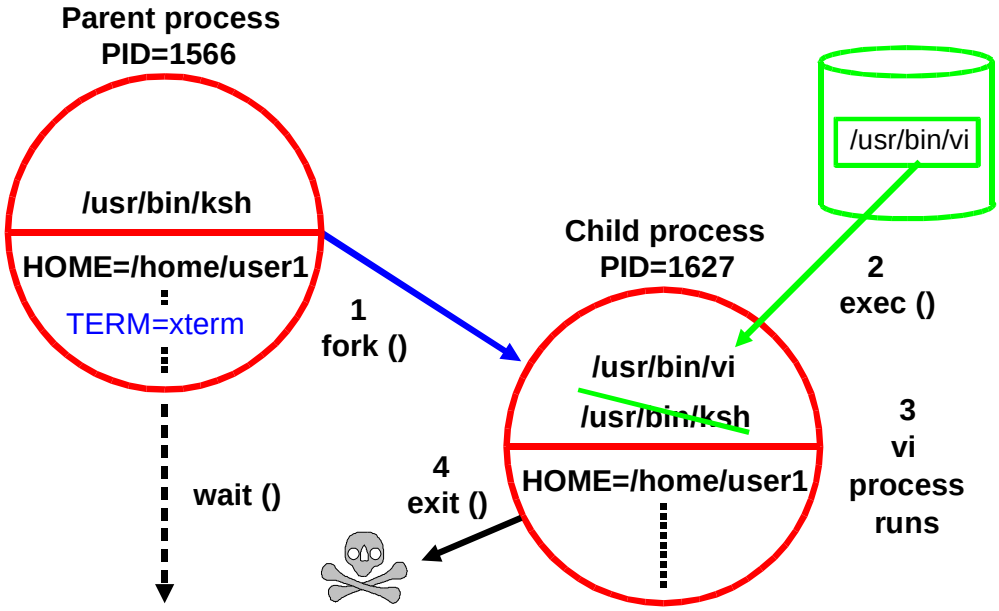
xterm

$

$

$ **vi f1**

Terminal 'unknown'
[Using open mode]
"f1" [New file]
:q!



$ **export TERM**

$ **echo $TERM**

xterm

$

$ **vi f1**

```
~
~
~
~
~
"f1" [New file]
:q!
```

$
